## Botrytis test kit

The EnviroLogix QuickStix Kit for Botrytis distributed by Fred C. Gloeckner & Co. Inc. in Harrison, N.Y., can detect the presence of various *Botrytis* species including *B. cinerea* in 10 minutes or less. The test is for use on leaf and petal tissue. It can be used pre- and postharvest. Each kit contains enough materials to run 25 tests.

## Conveyor wheels

The LG Conveyor Wheel from Midwest Caster & Wheel Inc. in Cincinnati, Ohio, has been redesigned. It has been equipped with an annular ball bearing that extends the full length of the wheel. The bearing consists of three raceways with a load capacity of 375 pounds per wheel. The DuPont Delrin wheel will not absorb chemicals and is 50 percent stronger and lighter than conventional conveyor and bench tray wheels.
